

# You too can "Dream Green"

Materials information for the 100%\* Recyclable  
BSI Exhibits/Nomadic Display Products  
**2008 Ts2 Trade Show Exhibit:**

- Aluminum components are from 38% post consumer waste and are 100% recyclable
  - Steel components are 100% recyclable
  - Wood products are either MDF made with waste product wood fibers and environmentally friendly binders or "green" plywood, both of which are 100% recyclable.
  - The flooring and veneer on the solid panels is genuine bamboo, a fast renewable lumber product and is 100% recyclable.
  - The thermoplastic laminates used on the casework are from 100% post consumer waste and are 100% recyclable.
  - Adhesives are Green-guard rated, water soluble, and 100% recyclable.
  - The carpeting is made from 100% post consumer waste PET polyester and is 100% recyclable.
  - The graphics are printed on recycled celtic cloth with water based inks and are 100% recyclable.
- \* all lighting and audio visual equipment is reusable.
